

TRACK 1: MERCHANT GROWTH AI

The Autonomous AI Business Partner for Every Paytm Merchant

Voice-first multilingual copilot that turns every Paytm Soundbox into an intelligent business manager — automating supplier audits, credit collection, cashflow forecasting, and restocking for India's 30M+ small merchants.

SARVAM AI

COGNEE

PAYTM SOUNDBOX

THE PROBLEM

India's 30M+ Merchants Run on Mental Math and Paper Khatas

₹12,400 Cr

Supplier Overcharges

Small merchants cannot track contracted rates across dozens of SKUs. Distributors routinely inflate unit prices by 5-15% — and nobody catches it.

68%

Khata Defaults

Informal credit (khata) is universal but unmanaged. 68% of kirana owners report losing revenue to customers who delay or default on credit.

4.2 hrs/day

Manual Operations

Daily P&L calculation, stock counting, payment tracking, supplier coordination — all done manually. No time left for actual business growth.

These merchants already have a Paytm Soundbox processing hundreds of UPI/Card transactions daily.

That Soundbox is an untapped AI gateway to their entire business.

Qora: Three AI Layers That Transform a Soundbox Into a Business Brain

SARVAM AI

Voice-First Multilingual Copilot

Merchants speak naturally in any of 11+ Indian languages. Sarvam Saaras v4 provides real-time speech-to-text with code-mixing support (Hinglish, Tanglish).

- Ask "How much revenue today?" in any language
- Query supplier dues, customer credit, stock levels
- Voice-driven business commands — no typing, no screens
- WebSocket streaming for sub-second response

COGNEE

Long-Term Business Memory

Cognee's Extract-Cognify-Load pipeline builds a persistent knowledge graph — every customer visit, supplier bill, and seasonal pattern is remembered forever.

- Customer nodes: visit frequency, avg spend, credit history
- Supplier nodes: contracted rates, overcharge patterns
- Seasonal nodes: Navratri/Diwali demand predictions
- 847+ memory nodes per merchant, growing daily

n8n

Autonomous Business Automation

n8n orchestrates 7 always-on workflows that eliminate manual operations — from bill scanning to credit collection to restocking.

- WhatsApp invoice OCR with auto rate-check
- Vernacular khata reminders via Sarvam TTS
- Predictive restocking with auto PO generation
- Daily P&L digest delivered to merchant at 10 PM

How Qora Works

LAYER	TECHNOLOGY	ROLE
Voice I/O	Sarvam Saaras v4 + Mayura Translation + TTS	Real-time STT in 22+ languages, WebSocket streaming, code-mix support
Memory	Cognee (Extract-Cognify-Load) + LanceDB	Persistent knowledge graph — customers, suppliers, seasonal patterns
Automation	n8n + WhatsApp Business API	Invoice OCR, khata reminders, restock triggers, P&L digests
Payments	Paytm AI Soundbox + Lending API	Transaction ingestion, UPI/NFC/QR, sachet micro-credit
Frontend	Responsive Web App (zero dependencies)	Merchant dashboard, voice copilot, ledger, analytics

Six Capabilities, One Soundbox

01

Supplier Bill Audit

Every WhatsApp invoice is auto-scanned. Line items extracted via OCR, cross-checked against Cognee's contracted rate memory. Overcharges flagged instantly — our demo merchant saved ₹2,940 in one month.

02

Khata Management

Digital credit ledger with Cognee-powered customer profiles. Tracks payment patterns, identifies chronic defaulters, and auto-sends vernacular WhatsApp reminders via n8n when credit exceeds threshold.

03

Cashflow Forecasting

7-day projection using Soundbox transaction velocity. Identifies cashflow gaps before they happen. Auto-triggers Paytm sachet micro-loans when net cash dips below supplier payment thresholds.

04

Smart Restocking

Monitors sales velocity per SKU. Predicts stockouts 24 hours in advance. Auto-drafts purchase orders and sends to distributors via WhatsApp — merchant just confirms with a voice command.

05

Festival Demand Engine

Cognee's seasonal memory learns from historical patterns. Before Navratri, Diwali, or local festivals, Qora recommends inventory adjustments — snacks +180%, dairy -40%, dry fruits 3x.

06

Sachet Micro-Credit

Pre-qualifies merchants for instant working capital based on Soundbox inflow velocity. ₹25K-75K loans at 1.2%/month with daily auto-debit from UPI collections. Bridges cashflow gaps automatically.

Why Qora Wins for Paytm

30M+

Addressable Merchants

Every Paytm Soundbox merchant is a potential Qora user. Zero additional hardware needed — Qora layers intelligence onto existing Soundbox infrastructure.

₹2,940

Monthly Savings / Merchant

Supplier overcharge detection alone saves thousands per month. Add credit recovery, stockout prevention, and time savings — Qora pays for itself from Day 1.

4.2 hrs

Daily Time Saved

Automated P&L, bill scanning, reminders, restocking. Merchants spend time growing their business instead of managing spreadsheets and WhatsApp groups.

Revenue for Paytm

- Sachet micro-loans: 1.2%/month on ₹25K-75K per merchant
- Premium Qora subscription: ₹299/month for advanced features
- Higher Soundbox retention — merchants who use Qora never switch
- Data-driven merchant lending at scale via Cognee credit scoring

Moat via Partner Stack

- Sarvam: Only voice AI with 22+ Indic languages and code-mixing
- Cognee: Persistent memory — gets smarter with every transaction
- n8n: Self-hosted automation — no vendor lock-in, full control
- Soundbox: Built-in distribution to 30M+ merchants

SUMMARY
